

PUMPKIN FACTS

Weights 1,332 pounds

This pumpkin traveled more than 1,600 miles from Andy Wolf Farm in Little Valley, New York to spend autumn with us in Texas.

This pumpkin was planted on May 1 of this year and from June 29, when it's first blossom set and it was about the size of a grape, it grew approximately 35 pounds a day.

This pumpkin will be available for our guests to enjoy from now through our Hill Country Harvest Festival that takes place during Halloween weekend.

After the season, the pumpkin seeds will be sent back to Andy Wolf Farm for them to plant and the pumpkin meat will be turned into compost for our garden.
